

YOUNG DEMOCRATS OF GEORGIA PLATFORM

As adopted by delegates to YDG Convention, April 13, 2013

PREAMBLE

I. Law & Justice

We believe in the fair application of the U.S. Constitution. We believe that the understanding of the constitution should be reexamined at every application. Even those in power are beholden to the laws of this nation and this state. We support civil rights at all levels for all persons.

II. Social Issues

We oppose attempts to infringe upon the civil rights of any group. We support allowing any person of legal age to marry, and we support allowing anyone over the age of majority to purchase alcoholic beverages.

III. Environment

We are aware of the scientific fact of human-caused climate change and of the tremendous inconvenience it will cause to future generations. We support the development of clean sources of energy and the implementation of plans for creating a more sustainable future. We recognize the challenges associated with clean energy, and we support nuclear power until renewable sources present a viable alternative.

IV. Education

We support public education. We remember the HOPE scholarship's purpose of increasing access to a college education, and we support the re-institution of an income cap as a requirement for eligibility. We support the teaching of science regardless of its implications in other realms. We support a dramatic increase in teacher pay.

V. Urban Development

We believe all communities need to be developed sustainably. We support the use of public transportation to aid in this effort, and we encourage state and local governments to consider alternatives to road building in addressing our transportation needs.

VI. Health Issues

We support universal access to health care and government efforts to expand coverage to as many people as possible. We oppose all efforts to limit access to safe abortions. We believe that electronic health records are crucial to effective healthcare, and we support evidence-based medicine.

Section I: Law and Justice

VII. Elections

We believe that a paper record of each person's vote is essential to democracy; we oppose voter identification laws. We support the abolition of the Electoral College. We oppose allowing elected representatives to change party without an election beforehand.

VIII. International Policy

We believe in multilateral diplomacy. Conflicts must be resolved peacefully, with the rights of the oppressed held in the highest regard. We support the self-determination of all peoples, in keeping with the United Nations Charter.

IX. Economic Policy

We believe every person should have the economic opportunity to live a dignified life. We support the rights of individuals to unionize. We support robust government regulation of the economy.

Section I: Law and Justice

SECTION I: LAW AND JUSTICE

1

Because we recognize that the criminal justice system is not without flaw in determining the guilt or innocence of an individual and because we recognize that the imposition of the death penalty is grossly disproportionate, particularly in regard to racial minorities and indigent persons, we support efforts to impose a moratorium on the death penalty and ultimately to repeal capital punishment in Georgia and the United States.

2

The government should respect those matters that its citizens hold most private; to fail to do so does irreparable harm to the liberties and freedoms of every citizen. Therefore, the government should not discriminate against people because of their sexual orientation or gender identity.

3

The Young Democrats of Georgia support restoring citizenship and voting privileges to felons who have completed their prison sentences.

4

The Young Democrats of Georgia, in support of the 6th Amendment to the U.S. Constitution, support publicly financed counsel for indigent defendants, with all deliberate speed, during all phases of their appeals process, especially in capital cases.

5

The Young Democrats of Georgia support allowing the residents of a proposed municipality to have a vote on whether or not they should incorporate as a city unless the proposed municipality is already located within a city limit.

6

We the Young Democrats of Georgia reject the theory of the unitary executive. We do not believe that the President of the United States has unlimited authority in regard to issues pertaining to national security and intelligence. Further, we believe that to leave an overly aggressive Presidency unchallenged sets a dangerous precedent for our country. We support the full investigation of crimes against the Constitution. If there is sufficient evidence to justify impeachment, proceedings should commence.

7

We oppose the practice of racial profiling by law enforcement and support measures to eliminate this practice in Georgia.

8

We oppose the inclusion of all arrested persons in a DNA registry.

9

We support adjusting the sentences for victimless nonviolent crimes from incarceration to community service and fines as an alternative in order to abate the financial strain on state budgets and to make funds available to the board of regents.

Section I: Law and Justice

10

The Young Democrats of Georgia support common sense gun control, which includes universal background checks, waiting periods, mental health checks, and limits on assault-style weapons and ammunition capacities.

11

The Young Democrats of Georgia oppose religious tests for public office.

12

The Young Democrats of Georgia oppose any privatization of the prison system.

Section II: Social Issues

SECTION II: SOCIAL ISSUES

1

We believe the Federal Marriage Amendment is unnecessary and should not become part of the U.S. Constitution. We also support removing Article 1, Section IV of the Georgia Constitution, which bans same-sex marriage.

2

We support laws that allow same sex couples to achieve a civil marriage and afford them the same rights as heterosexual civil marriages, including the right to adopt.

3

We support providing driver's licenses to all residents of Georgia who are of proper age and ability, to guarantee that those persons driving on Georgia's roads are qualified and responsible for their actions.

4

The Young Democrats of Georgia support the right of any consenting adult to enter and leave the institution of marriage without undue government barriers, as a matter of civil rights.

5

We believe that equality of rights under the law shall not be denied or abridged by the United States or any state on account of sex, and as such, we support the ratification of the Equal Rights Amendment in the state of Georgia.

6

We support hate crime legislation *designed* to enhance criminal penalties for acts of harassment, violence or intimidation committed because of the victim's race, color, ancestry, ethnicity, religion, sexual orientation, national origin, gender identity, or disability.

7

We support allowing any individual, regardless of sexual orientation or gender identity, to serve openly in any capacity of the U.S. military.

8

Because we support the humane treatment of animals, we promote the spaying and neutering of pets.

9

We do not support the discrimination of Georgians based on geographic location.

10

We believe that the age of legal contractual responsibility, 18, should be the determinant of legal ability to make responsible decisions regarding the purchase and consumption of alcohol. Therefore we support eliminating federal agency rules that set the drinking age to 21.

11

The Young Democrats of Georgia support giving our military veterans greater access to benefits, education, and job opportunities.

Section III: Environment

SECTION III: ENVIRONMENT

1

Seeing that pollution in Georgia's waterways is becoming an increasing problem, we advocate for the reduction and elimination of raw sewage being dumped into Georgia's rivers, lakes, and streams, with a special emphasis to be placed on the Chattahoochee River. We strongly believe that the surface and ground waters of the state should continue to be a public resource and should be managed in the public interest and in a sustainable manner by the state to protect natural systems and meet human and economic needs.

2

We do not believe revenues from the state's gas tax should be restricted to roads and bridges. We support an amendment to the Georgia Constitution to allow gas tax revenues to be used for green space protection, parks, mass transit, sidewalks, and bicycle trails.

3

All people have the right to clean air, water, and land. We believe that the promotion and protection of these rights, as well as reducing the harmful effects of global climate change, is consistent with, not in opposition to, a healthy and thriving economy. In order to further this effort, the Young Democrats of Georgia support stricter emission standards and the promotion of renewable energy.

4

Although Young Democrats support the idea of energy self-sufficiency for our nation, we oppose any efforts to exploit any federally or state protected park, wildlife refuge, monument, historical area, land, or other protected natural habitats, including national coastlines, for the purpose of oil and/or natural gas drilling and/or exploitation.

5

The Young Democrats of Georgia support the enforcement of state and federal environmental laws to promote and exemplify the ideals of stewardship, conservation, and intelligent development. We support the authority of the EPA and other designated agencies to act as advocates of the environment by instituting appropriate regulations.

6

We support the utilization of nuclear power as a non-fossil fuel alternative that can also meet present and future energy needs until more environmentally-friendly alternatives present themselves. We also support research into fusion and the reprocessing of spent nuclear fuel.

7

The Young Democrats of Georgia support the development and promotion of sustainable energy and alternative energy sources including, but not limited to, wind and solar energy, and we urge our elected officials in the Georgia General Assembly and U. S. Congress to enact legislation that will establish sustainable energy standards and sustainable energy portfolios.

8

We believe water management must be guided by a comprehensive state water management plan developed by a lead agency with a dedicated planning staff in coordination with other agencies and with the participation of all interested citizens. Effective water management requires regional water planning based on watersheds, river basins, and aquifers that is tied to implementation

Section III: Environment

including an adaptive management process; and regulation of inter-basin transfers must be strengthened to reflect scientific knowledge, respect natural systems, and protect the basins of origin and receipt.

9

The Young Democrats of Georgia support the reversal of the detrimental effects of nuclear and other industrial waste management, and the compensation of citizens and municipalities negatively affected by elevated levels of radioactivity and other carcinogens due to proximity to affected sites.

Section IV: Education

SECTION IV: EDUCATION

1

We support the full funding of the Individuals with Disabilities in Education Act to help students with disabilities in all public schools.

2

We, the Young Democrats of Georgia, support the *original purpose of the HOPE Scholarship to expand access to a college education to all Georgians, regardless of race or socioeconomic status*. We support additional revenue streams for Georgia colleges in order to bring down tuition costs and ease the Hope Scholarship's burden on lottery funds without forcing costs on students.

3

Promoting diversity must remain a vital criterion in the selection of students for admission to the colleges and universities that make up the University System of Georgia. To increase educational opportunities, we must enact progressive and creative programs that assist in the development of broad and inclusive admission policies through which our publicly supported colleges and universities reflect the economic, ethnic, gender, and social diversity of Georgia. We should offer students from varied racial and socio-economic backgrounds from all of our state's high schools the opportunity to be admitted to the colleges and universities that make up the University System of Georgia.

4

Because students and teachers hail from different ethnic, cultural, and religious backgrounds and because the Bill of Rights must be protected, we support the separation of church and state. While religious studies have an important place in literature and history classes, public schools should refrain from implicitly or explicitly endorsing a particular religion or religious belief.

5

We support a standardized system of grading for all primary and secondary schools in Georgia.

6

We support the local involvement of parents, legal guardians, students, and teachers on school advisory boards and state education panels.

7

We believe an overwhelming burden of standardized testing in our K-12 public schools promotes an unhealthy education system focused on uniform memorization at the sacrifice of individual thought, creativity, and practical learning that diminishes teachers to test-prep tutors. Standardized testing should be used for diagnostic purposes and not tied to education funding, teacher pay, or grade promotion.

8

Better education leads to better choices. In order to ensure that America's youth can make safe, responsible decisions, comprehensive sex education must be taught in schools, and access to free contraception must be provided.

9

We believe that early childhood education is supremely important to giving underprivileged children a chance to succeed. We support the national Head Start program and the state Pre-K

Section IV: Education

program. We oppose any and all cuts to these programs. We seek to expand these overwhelmingly successful programs so that all children in Georgia have a chance to succeed.

10

We believe in the value of public education as a means to better all of Georgia. Therefore we oppose any state funding of private primary and secondary educational institutions whether in the form of grants, loans, or vouchers. Furthermore, we oppose any attempt to repeal or amend Article I, Section 2, paragraph 7 of the Georgia Constitution, which prohibits state funding of religious institutions. However, where defined school systems do not have the ability to provide specialized services, for example speech therapy or services to students with disabilities, school systems should be allowed to contract for such services to better meet the needs of students.

11

We oppose any attempts to fund public schools in a regressive fashion that would hurt children in Georgia's poorest counties.

12

We respect the importance of academic freedom at our state's institutions of higher learning. We oppose the "Academic Bill of Rights" as an unnecessary intrusion by the state into the historically self-governed ranks of academia that threatens to undermine the free flow of knowledge in Georgia.

13

We support special federal and tax benefits for public school teachers, especially for teachers working in at-risk or needy areas.

14

We believe that the study of evolution in our schools is essential to students receiving a quality education. The Young Democrats of Georgia therefore oppose all attempts to abolish or undermine the place of evolution in the public education curriculum, including the addition of disclaimers to the evolution and the presentation of theories unsupported by scientific evidence as scientific alternatives to evolution.

15

We believe that the No Child Left Behind Act is an ineffective act that leaves children behind, and does not help the dismal state of public education in Georgia. We believe the act should not be renewed.

16

The Young Democrats of Georgia recognize the importance of scientific progress to our nation's general welfare and therefore support the equitable distribution of governmental funding for scientific endeavors, regardless of the political implications of its results. Additionally, we support the censure of officials who have suppressed scientific results for political reasons.

17

We believe that the eligibility requirements for the retention of the HOPE Scholarship should reflect the academic course of study of each student.

18

The Young Democrats of Georgia recognize that fine arts and physical education programs are necessities in the public school system and should receive adequate state funding.

Section IV: Education

19

The Young Democrats of Georgia support the teaching of hunting safety as an elective course in the public school curriculum, upon completion of which the student will receive a certificate or hunting license for successfully completing the course.

20

As we understand the value of education to the growth of the state of Georgia, we reject any attempts to reduce funding for education.

21

The Young Democrats of Georgia support the adoption of a statewide anti-bullying standard that includes protection against bullying. We believe bullying includes physical, virtual and verbal threats to a person including verbal taunting and public name-calling with intent to humiliate. Local school boards and schools need a framework from which to protect children and provide conflict mediation.

22

In order to promote safer driving practices among our most at-risk group of drivers, we support the creation and funding of a mandatory, comprehensive drivers education course at the high school level, throughout the state of Georgia.

23

The Young Democrats of Georgia are opposed to any system that bases teacher salaries on student performance. A merit-based pay system will reward teachers in affluent district and encourage teachers in less affluent areas to move to said district. This system will further the education gap between rural and suburban students.

24

In order to ensure a fiscally responsible society, we support the creation and funding of an elective domestic finances class at the high school level with a special emphasis to be placed on credit maintenance and long term financial planning.

25

The Young Democrats of Georgia support the full funding of extracurricular opportunities outside of the classroom through field trips and clubs such as 4-H.

26

We support allowing any academically qualified candidates to attend college in the state of Georgia, and we oppose any ban on enrollment at a Georgia college or university on undocumented individuals.

27

The Young Democrats of Georgia support the placement of an LGBTQIA resource center in every Georgia institution of higher education that receives any public funding to help questioning youth in their journey of self-discovery and provide support for all LGBTQIA individuals.

28

The Young Democrats of Georgia reject the creation of charter schools by any entity other than the democratically-elected local school boards, and believes that decisions made by locally elected school boards should be upheld and respected.

Section IV: Education

29

The Young Democrats of Georgia recognize the importance of a well-rounded K-12 education, including focuses on science, technology, engineering, and mathematics (STEM) education, as well as increased emphasis on literacy and writing skills.

30

The Young Democrats of Georgia oppose the redistricting of public schools based on separation of income levels or other socioeconomic characteristics.

31

The Young Democrats of Georgia strongly oppose the use of furloughs to balance the budget.

Section V: Urban Development

SECTION V: URBAN DEVELOPMENT

1

The Young Democrats of Georgia advocate policies that reduce the urban sprawl and environmental issues presented by over-reliance on automobiles. We support alternatives such as a statewide passenger rail system and planned community development, *with increased funding for multiple forms of mass transit.*

2

Twenty-first century society demands clean transportation systems that build communities and promote smart growth. In order to tackle the problems faced by rapid growth and environmental degradation, state transportation funding must be spent equally around the state based on population.

3

The Young Democrats of Georgia condemn the construction or renovation of highways or MARTA rail when such construction favors corporate development over private property rights or public housing and recreational facilities.

4

We believe all people should have access to healthy diets and urge better urban planning to prevent “food deserts”, areas of relative exclusion where people experience physical and economic barriers to accessing healthy food.

5

The Young Democrats of Georgia support the creation of a secondary city limit encompassing all of Metro Atlanta to give the city of Atlanta limited authority of taxation and urban planning over its satellite communities.

6

The Young Democrats of Georgia oppose any efforts to reconstitute or recreate Milton County.

7

We support investing in metro Atlanta’s public transit, and we insist that the MARTOC committee pass legislation that merges MARTA’s capital and operations budgets to avoid further cuts. We also support the expansion of MARTA to further provide for the growing population of the city of Atlanta and the metro area.

8

The Young Democrats of Georgia support the revitalization of Underground Atlanta to become an economically viable area for visitors and residents alike.

9

The Young Democrats of Georgia oppose gentrification as a method to exclude people of color and people in poverty from the development process of constantly changing urban areas.

Section VI: Health Issues

SECTION VI: HEALTH ISSUES

1

We believe that all women should have access to all reproductive options, including education, contraception, and abortion when necessary, regardless of socio-economic status. We fully support all provisions of the Roe v. Wade decision of the Supreme Court in 1973.

2

The Young Democrats of Georgia support the establishment of a single-payer universal health care system, including dental and vision care. We support the Patient Protection and Affordable Care Act as a good first step toward achieving this goal.

3

Patients and doctors should not have to absorb the costs of poor investments by insurance companies. A cap on court-ordered damages in malpractice cases fails to adequately recognize the pain and suffering experienced by Georgia citizens.

4

We support fully funding PeachCare for Kids and the provision of full, comprehensive healthcare for all children in America.

5

In the interest of protecting the physical and emotional health of young women, the Young Democrats of Georgia believe that no individual under the age of 18 should be required to produce one or more legal guardians in person before obtaining an abortion or other contraceptive, such as Plan B. We oppose the creation of extra barriers for women exercising their right to choose.

6

The Young Democrats of Georgia support the study and research of medicinal uses of marijuana, and we support the enforcement of the state's Controlled Substances Therapeutic Research Act.

7

As stem cell research holds great promise in the field of medicine, the Young Democrats of Georgia support the removal of barriers in this line of research and promote appropriate public funding to ensure continual research.

8

The Young Democrats of Georgia recognize the great sacrifice made by those members of our armed forces who are injured or killed in the line of duty. We support the expansion of programs to provide assistance to these men and women and their families as they recover from the debilitating effects of war on their own lives.

9

We recognize the pervasiveness of synthetic food products and support policies that reduce the use of high-fructose corn syrup and other hydrogenated oils in our daily lives.

10

We support funding and education of S.T.I. prevention and overall sexual health.

Section VI: Health Issues

11

We support adequate funding for HIV/AIDS education, prevention, and research. We believe every person living with HIV/AIDS should receive adequate funding for HIV/AIDS medications.

12

The Young Democrats of Georgia oppose any unnecessary or invasive physical procedures or forced counseling, which place any hindrances, obstacles, or otherwise attempts to interfere with a woman's right to obtain an abortion.

13

The Young Democrats of Georgia oppose any attempt to impose legislation or constitutional amendment that would define personhood as beginning at conception.

Section VII: Elections

SECTION VII: ELECTIONS

1

Democracy is the greatest experiment our nation and our state have attempted. Trusting the people to make informed decisions about their welfare and their society is the best form of government to promote the common good and to maintain peace. The Young Democrats of Georgia believe our government is best served when many citizens vote. As such we advocate making every general election in the month of November a national holiday.

2

The Young Democrats of Georgia believe that the existing Presidential primary system gives undue influence to certain states at the expense of states such as Georgia. Therefore, we support changes to the Presidential primary system that would give all states an equal opportunity to influence the selection of the Democratic Presidential nominee.

3

Young Democrats of Georgia pledge to work with organizations' constituent chapters to ensure that national resources and attention are focused on Southern states in current and future elections and campaigns. Local and state candidates are placed at a disadvantage when national campaigns divert manpower and money from the South to other states. Over half of the nation's African-American population is disenfranchised when Democratic candidates in the South are denied the Party support to organize and fund winning statewide campaigns.

4

The Young Democrats of Georgia support providing the option of statehood to Washington, D.C. and other U.S. Territories.

5

We believe that the Electoral College no longer serves a purpose in an America where information on presidential candidates is readily available and easily accessible. Therefore, we support a constitutional amendment that would abolish the Electoral College and provide for the election of the president by direct popular vote.

6

The Young Democrats of Georgia support the adoption of uniform standards for conducting state and federal elections as well as uniform standards for the recounting of ballots in disputed elections. We further call for a reliable, voter verifiable, paper trail in all elections.

7

So that equality and nondiscrimination may be forever protected by law, we support making the Voting Rights Act of 1965 permanent. Furthermore, we support efforts to expand the Act's provisions to apply to all states in the Union.

8

The Young Democrats of Georgia believe that elections should be free and fair. We oppose any legislation that will require a photo ID at the polls on Election Day because it places an undue strain on rural, elderly and minority voters who may not have the means to obtain a government-issued photo ID.

Section VII: Elections

9

The Young Democrats oppose any efforts to redraw legislative districts in order to gain a political advantage or to disenfranchise the youth and minority vote. In pursuit of this goal, we support the use of a non-partisan, outside method of redistricting.

10

The Young Democrats of Georgia believe that redrawing legislative and district lines should only be done once every ten years, following the national census. Individual states should pass laws to this effect.

11

The Young Democrats of Georgia support the extension of early voting to include the Saturday, Sunday, and Monday before Election Day.

12

The Young Democrats of Georgia support the introduction of Instant Runoff Voting at all levels of government.

13

The Young Democrats of Georgia support punitive measures for elected officials who switch parties after an election without first resigning their position.

14

The Young Democrats of Georgia support extending voter registration deadlines to include same-day registration.

15

The Young Democrats of Georgia support the adoption of sensible national standards for the governing of elections and a national voter registration database that would help voters stay registered despite moving or changes in life circumstances.

Section VIII: International Policy

SECTION VIII: INTERNATIONAL POLICY

1

Although Young Democrats support the right of this nation to defend itself and its borders, we believe that our nation is at its strongest and serves its interests best when we work in concert and coordination with our allies and other members of the international community rather than acting alone.

2

We believe that this nation is founded on the strengths of immigrants who sought a better future in the United States. Immigration reform is vitally important to continued economic prosperity in the State of Georgia. There should be a path to citizenship for immigrants who already reside in the U.S. illegally and are not felons. We also reject any legislation that would subvert federal control of immigration policy and enforcement.

3

The Young Democrats of Georgia believe that all active duty armed forces, serving in a combat zone during a time of conflict should be entitled to the same pay scale, benefits, and pension.

4

We oppose the use of torture as defined by the Geneva Conventions and the indefinite detention without due process by the federal government for any reason.

5

The Young Democrats of Georgia support the UN Millennium Development Goals and the federal government fully following through on its commitments to pledge 0.7% of GDP in real aid to developing countries. We recognize the Millennium Development Goals as one of the best ways to strengthen the US in the global community and at home.

6

The Young Democrats of Georgia support the United Nations Organization and its role in international peacemaking, peacekeeping and providing humanitarian aid.

7

The Young Democrats of Georgia support international agreements and organizations that limit nuclear weapons proliferation and promote safe and use of nuclear energy for peaceful purposes.

8

The Young Democrats of Georgia support reducing the United States' dependence on foreign oil, in part by increasing fuel efficiency standards.

9

We oppose any exchange of nuclear technology with nations that are not signatories to the Nuclear Non-Proliferation Treaty.

10

In an effort to promote world stability and the two-state solution, we oppose actions of the Israeli and Palestinian governments that undermine the peace process. Furthermore, we support the reduction of US Government support for either government if they continue such actions.

Section IX: Economic Policy

SECTION IX: ECONOMIC POLICY

1

Each generation should build its fortune upon its own ingenuity, not upon the wealth of the preceding generation. The Young Democrats of Georgia support the inheritance tax. This will encourage more charitable giving and help society pay for important programs.

2

We support family farms over agribusiness. We call for farm plans designed to help family farmers.

3

To promote American agriculture, fair labor, standards, and the environment, we support tariffs for goods produced in countries lacking comparable labor and environmental standards to the U.S.

4

We believe that this country was founded on the backs of laborers and we must honor and protect the hardest working among us. We support all laws that allow workers to organize and collectively bargain. We oppose all laws and practices that dilute workers' rights, including right-to-work legislation.

5

In order to ensure equal access and equal opportunity for all Americans, we support affirmative action programs as part of equal opportunity employment practices and encourage hiring a work force that is diverse in age, cultural heritage, disability, economic status, sex, race, views on religion, sexual orientation or identity, employment status and credit worthiness.

6

Because all Americans deserve to be treated equally and fairly, we strongly support all local, state, and federal legislation that aims to close the pay gap in America and offers equal pay for equal work regardless of sex, ethnicity or religion.

7

The Young Democrats of Georgia, as inheritors of the legacy of Franklin D. Roosevelt, reject any attempt to weaken our nation's promise of social security. In particular, we hold that privatization would cripple our economy with further debt and harm the long-term health of the program, while benefiting investment companies rather than the people who pay into the system.

8

The Young Democrats of Georgia support private property rights and a reasonable use of eminent domain for public use only.

9

The Young Democrats of Georgia support strengthening laws against predatory lending.

10

We believe that large budget deficits, at the federal level, place an undue strain on the U.S. economy at home and reduce the value of the dollar abroad. We also believe that federal budget deficits leave future generations of Americans with the unnecessary burden of paying down a

Section IX: Economic Policy

debt they didn't create. That is, we support a balanced federal budget, but we oppose any attempt to balance the budget by weakening programs such as Headstart, Social Security, and Medicare.

11

The Young Democrats of Georgia support a balanced approach of tax increases and spending cuts for paying down of the National Debt.

12

To support the dignity of all Americans, the Young Democrats of Georgia support a social safety net that will ensure that all Americans can have food to eat and a place to sleep.

13

To allow more entrepreneurial activity by Americans and more participation by women and parents, we support a system of government-subsidized day care.

14

While we support the use of federal power to set minimum standards and conditions for life in America, we oppose the use of federal power to prohibit states from engaging in beneficial experiments and maintaining their role as "laboratories of democracy."

15

We believe all people regardless of socioeconomic status should have access to affordable housing.

16

The Young Democrats of Georgia support legislation to provide financial disincentives to Georgia corporations moving employment either to another country or inside a prison system.

17

We believe that current minimum wage levels are far too low to support our working families. We support all efforts on the local, state, and national levels to provide a living wage to our hard working labor force and we respect the right of local governments to enact living wage legislation.

18

A person's freedom of innovation should never be inhibited by any corporation. Therefore any clause in a contract that requires the innovations of an employee made on that employee's time using employee resources to be property of the corporation should be prohibited.

19

We as Young Democrats believe that small business is the growth engine of our economy. We call for development monies to be spent in increased support and guidance to new business.

20

The Young Democrats of Georgia support strong regulation of all natural monopolies, such as natural gas and telephone service, to prevent consumer gouging through sham competition.

21

The Young Democrats of Georgia support the recognition of unions based on worker support as expressed through a "card-check" system.

Section IX: Economic Policy

22

The Young Democrats of Georgia believe there is genocide occurring in the nation of Sudan. Because of the problems in the Sudan, we believe in the divestment of state controlled funds from the nation of Sudan. The Young Democrats of Georgia believe that state and federally controlled funds should divest from any nation where genocide is internationally recognized as occurring.

23

The Young Democrats of Georgia understand that a right to fire is a right to starve. We therefore support amending Georgia law to replace Georgia's at-will employment laws with a requirement that employees be bound by a covenant of good faith and fair dealing.

24

The Young Democrats of Georgia oppose the excessive contract buyouts given to corporate executives when they are removed from the company.

25

We support a tax system that provides for diversity of sources to provide the most stable possible revenue stream for the state.

26

The Young Democrats of Georgia support the state park system and the hunting, fishing and tourism industry. We oppose the privatization of our state parks in part, or whole.

27

The Young Democrats of Georgia support the regulation of banking and investment industries, with a focus of reducing risk and promoting safer lending practices.

28

The Young Democrats of Georgia support renewed federal restrictions on television and radio media consolidation.

29

The Young Democrats of Georgia support the tethering of Executive Compensation to corporation performance.

30

To ensure that sales taxes owed to the state and local government are collected appropriately and timely, the Young Democrats of Georgia support the point-of-sale collection of all sales taxes and the flow of information concerning business licenses and sales tax certificates between local governments and the state.

31

We support the implementation of a federal transaction tax which would place a small fee on all transactions on a financial market such as the New York Stock Exchange.

32

We support the celebration of significant historical events, such as the Sesquicentennial Celebration of the American Civil War, the founding museums, and the preservation of lands for the purpose of developing an economy that takes advantage of collecting heritage tourism dollars from visitors to this state.

Section IX: Economic Policy

33

The Young Democrats of Georgia support updating state regulations on beer and malt beverages to match those for wine, including permitting direct brewery sales for on- and off-premise consumption, increasing allowable yearly home production from 50 to 200 gallons, and raising the maximum alcohol content from 14% alcohol by volume (A.B.V.) to 21% A.B.V.

34

The Young Democrats of Georgia propose tax returns be accompanied by a receipt to inform taxpayers how their individual contribution is distributed among state and federal programs.

35

The Young Democrats of Georgia support food stamps' more widespread acceptance at local farmers' markets, and further support their being worth twice face value when used at such locations to allow the impoverished better access to healthy food while encouraging local agriculture.
